# Introduction

West Virginia Code Chapter 33, Article 20, Section 19 requires the Offices of the Insurance Commissioner to publish annually a list of current premium rates for minimum automobile liability insurance.

**Section I** of this report contains auto rates for writers of mandatory coverage limits as set forth in §17D-4-2 of the West Virginia Code. Only liability and uninsured motorist insurance premium data were collected because the Code does not require comprehensive, collision, medical payments, underinsured motorist, or any additional or special coverages. Again for the 2009 Survey, **Section II** of the report lists auto rates for selected West Virginia border cities as well as for nearby neighboring cities in the surrounding States. This information is presented at both State required minimum limits of insurance (*which will vary from State to State*) as well as on a comparable limit basis.

## **Section I assumptions**

Comparing auto insurance rates is somewhat complex. These rates will vary due to many factors, including the driver's age or sex, garaging location, the type of vehicle and household makeup, just to name a few. In order to simplify the comparisons, specific driver criteria and certain levels of coverage have been assumed so as to obtain premiums that are only for the purposes of comparison. The coverages which are included in the comparison examples in this Section meet only the minimum insurance requirements of our *financial responsibility limits law* §17D-4-2. These amounts are: \$20,000 bodily injury liability per person, \$40,000 bodily injury liability per accident, and \$10,000 property damage liability per event. This is commonly referred to as "20/40/10" liability coverage. Similarly, 20/40/10 coverage for uninsured motorists insurance is also mandatory in accordance with §33-6-31 and therefore has also been included in all of the rating examples. All rates shown in this report were requested to be provided on an annual basis. The "preferred/standard" writing company premiums will generally assume that the hypothetical drivers have not incurred any moving violations, license suspensions, or chargeable accidents during their experience rating period and that they have also maintained continuous auto insurance as is required by law. The "non-standard" writing company premiums generally apply to drivers who may have incidents on their driving records, or who have otherwise failed to maintain compulsory auto insurance as required by law. Note, however, that no accident or moving violations are assumed in the rating examples for either category of writing company. The exact written instructions provided to every company participating in the survey are included in the Appendix of this report.

For more information about compulsory insurance, please contact us:

**West Virginia Offices of the Insurance Commissioner**  
**1124 Smith Street**  
**Charleston, WV 25301**  
**304-558-3386 or 1-888-TRY-WVIC**  
<http://www.wvinsurance.gov>

As has been done historically, ten hypothetical drivers were selected for this portion of the survey. These vary only with respect to their ages, sex, marital status, and annual mileage driven. The sample risks included in the survey are:

An **18 year old single male** who has two years of driving experience, is the principal operator of the vehicle, who regularly commutes to-and-from school, and averages driving about 10,000 miles per year.

An **18 year old single female** who has two years of driving experience, is the principal operator of the vehicle, who regularly commutes to-and-from school, and averages driving about 10,000 miles per year.

A **25 year old single male** who has eight years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **25 year old single female** who has eight years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **35 year old married male** who has nineteen years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **35 year old married female** who has nineteen years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **48 year old married male** who has thirty-two years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **48 year old married female** who has thirty-two years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **62 year old married male** who has forty-six years of driving experience, is the principal operator of the vehicle, does not regularly commute (pleasure usage only), and averages driving about 12,000 miles per year.

A **62 year old married female** who has forty-six years of driving experience, is the principal operator of the vehicle, does not regularly commute (pleasure usage only), and averages driving about 12,000 miles per year.

The premiums for each example driver are provided for each of ten cities: Beckley, Bluefield, Charleston, Clarksburg, Huntington, Martinsburg, Morgantown, Parkersburg, Wheeling and Williamson. Each page of this Section of the report contains one of the distinct driver-types. Five of the ten cities appear alphabetically on a given page and the remaining five cities will appear on the following page for the same driver-type. On every third page, the example driver-type will change. As it is now commonplace that companies vary their premiums based upon the specific garaging zip code of a risk, and several of the cities included in the survey have multiple zip codes associated with them, specific zip codes have been selected to better ensure that the intra-city rates being provided are indeed based upon comparable criteria. For the survey, the following zip codes by city were assigned for the purpose of responding to the survey:

City	(Zip Code)
Beckley	(25801)
Bluefield	(24701)
Charleston	(25303)
Clarksburg	(26301)
Huntington	(25701)
Martinsburg	(25401)
Morgantown	(26505)
Parkersburg	(26101)
Wheeling	(26003)
Williamson	(25661)

While the examples selected will most likely not fit your situation, they do provide a relative guideline. Your exact rate would be based on each company’s individual underwriting and rating rules, and because companies vary greatly in their individual underwriting and rating rules, it is therefore always advisable to get quotes from several companies.

**Section II assumptions**

As was initiated during last year’s survey, again six West Virginia cities were selected that are located at or very near to our State’s borders. For each of these West Virginia cities, at least one nearby city located in a neighboring State was also surveyed for the purposes of establishing a State to State comparison. Because the minimum amounts and types of insurance vary from State to State, two distinct comparisons were made. The first comparison was made on a minimum required limits, or on a minimum cost-to-cost basis. In other words, premiums were provided for only the minimum amount and type of coverage required by the law of the State in which the city is located, and this comparison provides some insight about how the different mandatory limits and coverages in each State impact the by-State premiums, and how the actual basic expenses of individuals who are only insured at State minimum levels compare from State to State. The second comparison attempts to obtain premiums on a more equitable basis by comparing premiums for the same limit of coverage between each of the selected cities. In other words, all premiums are for the same level and type of coverage (*to the degree that the same is possible due to variances in State insurance laws*). While not every company surveyed was capable of writing personal auto insurance in every State surrounding West Virginia, several of the surveyed companies were able to provide a rate for every surveyed city, and comparing the rates of only these companies provides a fairly equitable basis of comparison.

Similar to the procedure of **Section I**, only two different operators were chosen for this portion of the survey:

A **48** year old **married male** who has thirty-two years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

A **48** year old **married female** who has thirty-two years of driving experience, is the principal operator of the vehicle, who regularly commutes ten miles one-way to work, and averages driving about 20,000 miles per year.

The minimum amounts and types of coverage for the six West Virginia cities surveyed are the same as were requested for **Section I** of the survey (*Bodily Injury and Property Damage Liability at \$20/\$40/\$10 and Uninsured Motorist Bodily Injury and Property Damage [UM] at \$20/\$40/\$10*). The selected zip codes for these cities were also the same as examined for **Section I**.

The amounts and types of coverages for the surrounding States (*under the minimum requirements for each of those States*) are:

Kentucky:  Liability at \$25/\$50/\$10, and Personal Injury Protection [PIP] Coverage

Maryland:  Liability at \$20/\$40/\$15, PIP, and UM

Ohio:  Liability at \$12.5/\$25/\$7.5

Pennsylvania:  Liability at \$15/\$30/\$5 and Medical Benefits [MB] Coverage (*similar to PIP*)

Virginia:  Liability at \$25/\$50/\$20 and UM

The second portion of this section of the survey requested that each of the premiums provided for each of the selected cities should afford coverage at the same limit and type of coverage. The premiums provided for each of the cities then would not vary by the amounts and types of coverages being provided by State except in those States where PIP or MB coverage is mandatory. (*Albeit that in the no-fault insurance States where PIP coverage is either required or is otherwise available, generally an increase in the cost associated with obtaining PIP coverage is relatively offset by an associated decrease in the cost of obtaining the liability portion of coverage.*) This section then proceeds to compare the rates of each of the surveyed cities with the following limits and coverages for each of the following States:

Kentucky:  Liability at \$100/\$300/\$50, UM at \$100/\$300/\$50, and PIP (*stated separately*)

Maryland:  Liability at \$100/\$300/\$50, UM at \$100/\$300/\$50, and PIP (*stated separately*)

Ohio:  Liability at \$100/\$300/\$50, UM at \$100/\$300/\$50

Pennsylvania:  Liability at \$100/\$300/\$50, UM at \$100/\$300/\$50, and MB (*stated separately*)

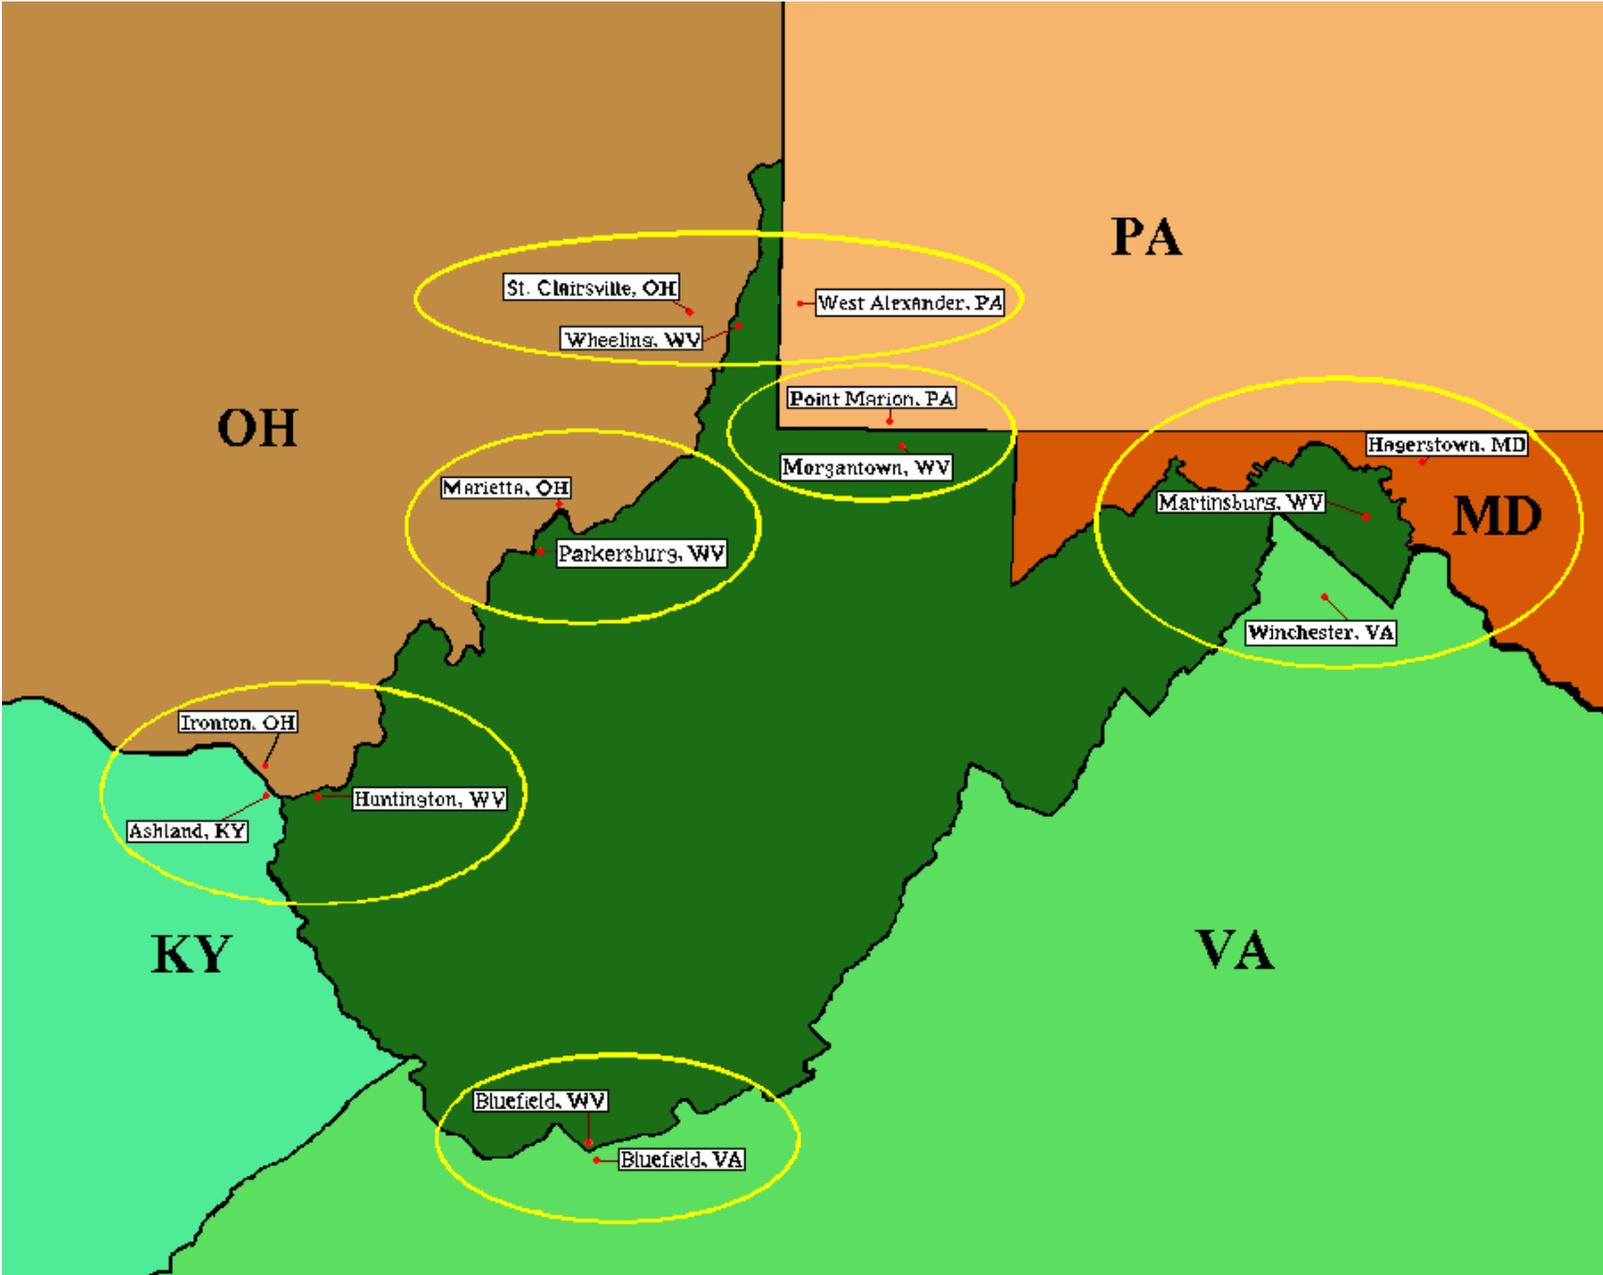

Virginia:  Liability at \$100/\$300/\$50, UM at \$100/\$300/\$50

West Virginia:  Liability at \$100/\$300/\$50, UM at \$100/\$300/\$50

As in **Section I**, specific zip codes were utilized for the cities in the surrounding States as well:

City	(Zip Code)
Ashland, KY	(41101)
Hagerstown, MD	(21740)
Ironton, OH	(45638)
Marrietta, OH	(45750)
St. Clairsville, OH	(43950)
Point Marion, PA	(15474)
West Alexander, PA	(15376)
Bluefield, VA	(24605)
Winchester, VA	(22601)

For the purposes of examining how the rates for personal auto insurance in West Virginia compare to those in our neighboring States, the following inter-state examples can then be examined:

Some comparison may then be drawn by examining the premium relationships between the following groups of cities:

- Bluefield, West Virginia ↔ Bluefield, Virginia*
- Huntington, West Virginia ↔ Ashland, Kentucky ↔ Ironton, Ohio*
- Parkersburg, West Virginia ↔ Marietta, Ohio*
- Wheeling, West Virginia ↔ St. Clairsville, Ohio ↔ West Alexander, Pennsylvania*
- Morgantown, West Virginia ↔ Point Marion, Pennsylvania*
- Martinsburg, West Virginia ↔ Hagerstown, Maryland ↔ Winchester, Virginia*

## Additional Information about the Sampled Companies

---

The companies which appear in this report were selected for inclusion in the survey because their individual 2007 market shares by written premium volume (*the most recent available at the time when the survey was distributed to companies*) were among the top 50 active licensed companies writing business in West Virginia. A company's market share is determined by comparing the dollar amount of premiums that a given company had written in West Virginia during a given year to the total premiums written by all companies over the same period, for the same line of business. Thus, many active companies with smaller private passenger auto premium volumes do not appear in this survey. Specifically, in 2008 there were a total of 151 licensed companies reporting activity in West Virginia (*where activity is defined as either writing premiums, earning premiums, incurring losses or paying losses*) in the private passenger automobile line of insurance business, however only 40 companies have sample premiums shown in this survey, yet they comprise over 86% of the premiums written in West Virginia during 2008.

---

The inclusion of any particular company's rates in this survey does not necessarily imply that they are accepting new business at any given time.

---

The companies have been divided into categories labeled "Preferred, Standard Companies" and "Non-Standard Companies." This is not a hard-and-fast distinction, but rather is subject to some interpretation. Generally, the "Preferred, Standard Companies" write policies for the best drivers who have maintained continuous auto insurance coverage, whereas the "Non-Standard Companies" write policies for drivers who have one or more driving violation(s) or who have failed to maintain compulsory automobile insurance. The companies responding to the survey each made a selection to indicate whether the rates which they were providing were either "Standard" or "Non-Standard" rates. Non-standard Companies are those which are subject to the specific requirements of §33-6-31c and §114CSR37, and make use of what are otherwise known as "Substandard" rates.

---

As of the publication date of this survey, the following companies have specific eligibility requirements:

- Availability limited to U.S. Military Officers, Non-Commissioned Officers, National Guard and Reserve, and adult children and spouses of current or former USAA members:  
*United Service Automobile Association*  
*USAA Casualty Insurance Company*
- Eligibility for *Trumbull Insurance Company* requires AARP Membership

## Frequently Asked Questions

---

**Q.** Is an insurance company obligated to issue an automobile insurance policy to me?

**A.** No. Automobile insurance companies operating in West Virginia are not required to issue policies to all applicants. Each company has its own underwriting requirements and may decline to issue a policy if the applicant does not meet the company's criteria. However, also see the response to the question at the bottom of this page concerning the assigned risk plan ("**AIPSO**").

---

**Q.** How much will my insurance cost?

**A.** Prices vary widely. The type of automobile you drive, your driving record, your age, your gender, where you live, how much you drive, and even your credit usage history may affect the cost. Also, you may qualify for various discounts.

---

**Q.** Will my rates go up or will I lose my insurance if I am involved in an accident or get a ticket?

**A.** The answer depends upon whether the accident or ticket is your first or one of many, and whether you were at fault for the accident. Multiple accidents or moving violations within a specified time period are grounds for an insurance company to either cancel or nonrenew your automobile insurance policy. Short of actual cancellation or nonrenewal, tickets for moving violations and at-fault accidents are often factored into the premium you will pay for your automobile insurance. If you are involved in an accident and it is determined that someone else was at-fault, then there will generally not be an increase in your premium due to the accident. Additionally, failing to maintain continuous auto insurance coverage is generally viewed by auto insurers as a negative indicator of your specific exposure to future loss. Talk to your agent to become familiar with what your specific insurance company does.

---

**Q.** How can I obtain insurance if I have been rejected by several companies?

**A.** If all attempts fail and you are unable to obtain automobile insurance, any licensed agent can obtain insurance for you through the **West Virginia Assigned Risk Plan** ("**AIPSO**" or the **Auto Insurance Plan Services Office**). **AIPSO** should be a last resort because the premium is generally substantially higher than that of any of the voluntary insurance companies. **AIPSO** is designed to provide a means by which risks that in good faith are entitled to automobile liability insurance, but are unable to secure it in the voluntary market, may be assigned to an authorized insurance company. Comprehensive and collision coverages are available, subject to a deductible, but cannot be purchased separately from the liability insurance. Non-owned vehicles in which you have an insurable interest as well as commercial vehicles may also be insured with **AIPSO**.

---

## Frequently Asked Questions—Continued

---

**Q.** Do I have a grace period for the payment of my automobile insurance premium?

**A.** No. There is no grace period in an automobile insurance policy, therefore it is imperative that the insurance company receive the premium on or before the date it is due. If time is short, you may want to contact your agent to make arrangements for the payment of your premium at the agency. You may also have an option to submit the payment electronically.

---

**Q.** If I call an agent for a quote of auto insurance premiums and later decide to apply for a policy based on the rate that was quoted, is the company bound to provide coverage using that rate?

**A.** No. The quote is merely a tentative offer of insurance coverage using an expected premium based upon the information that you had provided to them. The insurance company will determine the final premium if it later elects to issue the policy.

---

**Q.** Will the insurance company settle my claim based on the lowest repair estimate I submit?

**A.** Perhaps. If a company feels the repair estimates submitted are too high, they have the right to check elsewhere. However, if they direct an insured to a specific shop, they are giving an implied warranty on that shop's workmanship and must stand behind the work.

---

**Q.** Under the terms of the collision coverage in my automobile policy, do I have the right to make the decision as to whether repair, replace or receive cash for my wrecked automobile?

**A.** No. That is one of the rights given to the company under your policy.

---

**Q.** I recently had an accident in my five year old automobile and the company wants to repair it by using after market crash parts (*i.e. parts not manufactured by the original manufacturer*). Can they do this?

**A.** Insurance companies may not require the use of after market crash parts on motor vehicles requiring repair in the current year of their manufacture or the two following years. (*i.e. This only applies to vehicles 3 years old or less, otherwise it is permissible.*) For further information about this issue, contact the West Virginia Offices of the Insurance Commissioner's Consumer Services Division at 1-888-TRY-WVIC.

---

## Frequently Asked Questions—Teenage Drivers

In every country in the world where cars are a common mode of transportation, teenagers are disproportionately involved in motor vehicle crashes. The seriousness of this problem has been recognized for decades but most public policies have had little impact on the problem. Newer approaches, such as graduated licensing systems, have been enacted in some states to try to reduce teenage crashes and the deaths and injuries they cause.

---

**Q.** Why are insurance premium rates for teenagers so high?

**A.** Teenage drivers have very high rates of both fatal and nonfatal crashes compared with drivers of other ages. Mile for mile, teenagers are involved in three times as many fatal crashes as all other drivers.

---

**Q.** How serious is the teenage motor vehicle crash problem?

**A.** According to 2006 *National Highway Traffic Safety Administration* data, 3,490 young drivers aged 15-20 died in the United States from motor vehicle crash injuries, and fatalities among this age group have increased three percent over the period 1996-2006. Motor vehicle crashes are the leading cause of death for 15-20 year olds, and in 2006 they had the highest fatal crash involvement rate of any age group with 59.5 fatal crashes per 100,000 licensed drivers. This is more than double the rate for any age group over age 35.

---

**Q.** How do crashes involving teenagers differ from those of other drivers?

**A.** Teenagers not only have higher crash rates than other age groups but their crashes are different. Analysis of fatal crash data indicate that teenage drivers are: more likely to be at-fault in their crashes; their crashes often involve speeding; they are often single vehicle crashes; their crashes are often at night and involve the use of smaller and older cars compared to adults.

---

**Q.** How do teenage crash rates compare with rates among elderly drivers?

**A.** Although elderly drivers' mileage-based crash rates are as high as teenagers', older drivers have lower insurance rates. The fact that relatively few elderly drivers are involved in crashes, despite their high crash risk, is because elderly people with licenses drive fewer miles on average than do younger drivers.

---

**Q.** Can I be added to my parents' automobile insurance policy?

**A.** If you reside in your parents' household and operate a motor vehicle listed on your parents' policy, then you may be added to your parents' policy; however, depending upon the age and the driving record of the newly added operator, the cost of the policy may increase. If you have your own automobile, your parents' company may also sell you a separate policy but at a different rate than that of your parents.

---

*Annual Rates as of 1/1/09*

# Discussion

This guidebook lists current auto rates throughout West Virginia. These rates are influenced by many cost factors. Included in these factors are seat belt usage, medical costs, traffic congestion, pricing competition, speed limit enforcement, and many, many others. Below we discuss just three factors that impact auto insurance rates: auto insurance company market shares, regional loss differences within the state, and national price inflation.

## 1. Market Share

As of 2008, a total of 151 different insurance companies were actively engaged in personal auto insurance in West Virginia. However, our personal automobile insurance market is characterized by only a few dominant firms which account for a large part of all sales, and many smaller firms which make up the remainder. The current market structure has existed in relatively the same fashion for many years and is shown in *Figure 1*.

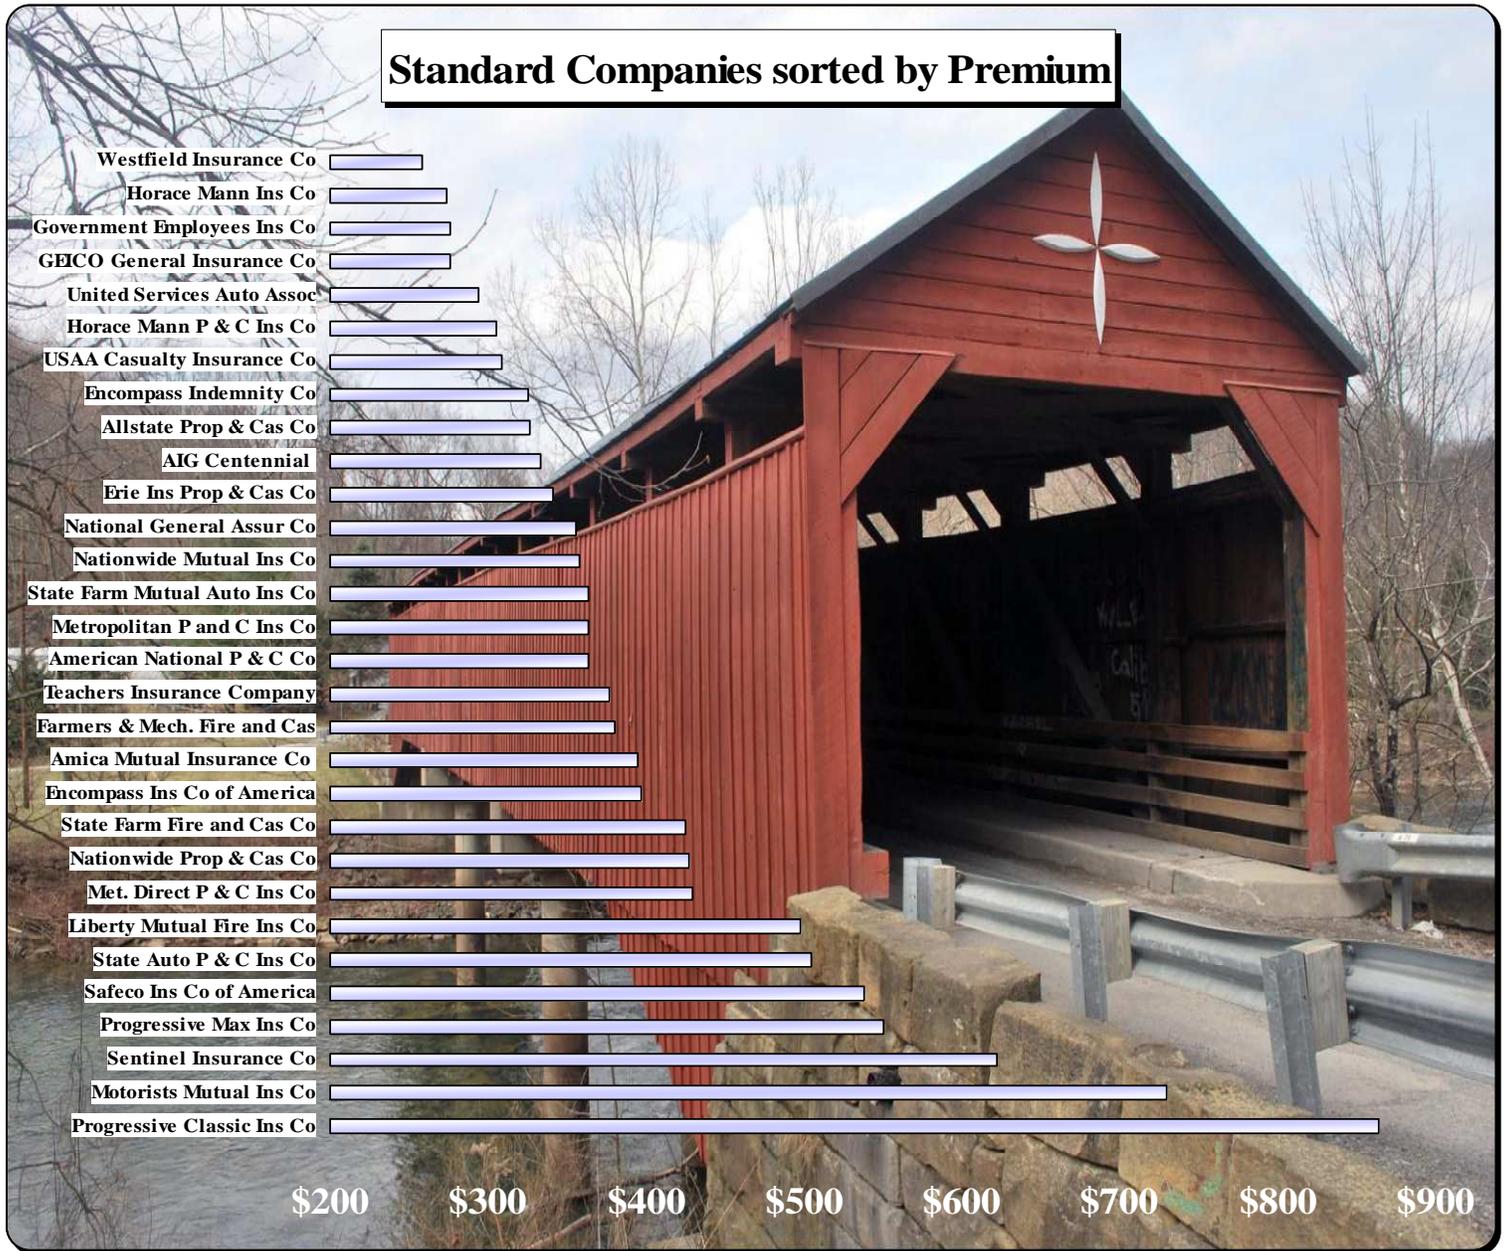

**Figure 1. West Virginia Private Passenger Auto Market Shares, 2008**

Source: National Association of Insurance Commissioners Annual Reports, lines 19.2 and 21.1, 2008.

The pie chart from *Figure 1* shows that the dominant firm, *State Farm Mutual Automobile Insurance Company*, currently has a market share of 25 percent. The second carrier, *Nationwide Mutual Insurance Company*, is a distant second with only 16 percent of the market, and *Erie Insurance Property & Casualty Company* is third with 10 percent. What are the consequences of this market structure? At first we might suppose that the three dominant firms (*each having 10 percent of the market or more*) would be able to control the market to the detriment of all other competitors. However, when the companies are ranked by average premiums, the relationship between auto rates and market dominance is much less clear. This is shown graphically in *Figure 2* on the following page.

**Figure 2. Standard Companies Sorted by Premium**

Source: 2008 Auto Survey; 35 year-old married female in Clarksburg.

**Figure 2** suggests that the market leaders are not systematically more expensive or cheaper than the smaller firms, as all three companies which were previously mentioned are roughly in the center of the pricing continuum demonstrated above. Alternatively, it is also established that a great deal of variation in auto insurance rates can be seen to exist in the marketplace, and therefore motorists should be advised to obtain quotes from several insurance companies before making a decision to purchase.

## 2. Regional Differences in Auto Rates

Fairly significant regional differences exist in auto insurance premiums within the State. Differences in auto insurance rates in general between separate territorial areas (*however defined*) can be attributed to many factors: differences in urban versus rural exposures (*for example: traffic exposures, road surfacing, commuting mileage, animal hazards, etc*), varying exposure to weather conditions (*disparate propensities for loss due to hail, flood, or wind and wind-blown debris in different areas*), differences in theft rates, and many others. Because of the complicated nature of insurance underwriting, it is difficult to pinpoint the strongest explanatory variable in this list. Nevertheless, we identify these regional differences in rates in **Table 1**.

**Table 1. Rate Comparison by Metropolitan Area (Rank Ordered)**

<i>Metropolitan Area</i>	<i>Average Annual Rate</i>
<b>Martinsburg</b>	\$375
<b>Clarksburg</b>	\$401
<b>Morgantown</b>	\$404
<b>Wheeling</b>	\$439
<b>Parkersburg</b>	\$450
<b>Beckley</b>	\$467
<b>Huntington</b>	\$467
<b>Bluefield</b>	\$469
<b>Charleston</b>	\$474
<b>Williamson</b>	\$568
<i>Statewide Average</i>	<b><i>\$451</i></b>

Note: Forty-eight year-old married male; standard companies only.

**Table 1** shows averaged rates from all companies responding to the survey for a typical 48 year-old married male driver. In this comparison, rates are the highest in the Williamson area; approximately 51 percent higher than rates in the Martinsburg area for the same risk. Moreover, Williamson's rates are 25 percent higher than the state average, whereas Martinsburg's are shown to be about 20 percent lower. The best explanation for this large rate disparity is that company losses have generally and historically tended to be higher in the Williamson area as opposed to those in the other comparison cities, and losses in the Martinsburg area for this type of risk have tended to be lower, etc. These regional premium differences have been relatively stable over the past several years.

## 3. Year-to-Year Changes in Rates

A) Now we look at the rate of change in auto insurance prices over the past three years and make a comparison with the national inflation rate. An easy way to do this is to look at the *median company*, i.e., the company that falls in the middle when all companies are ranked. We select the median company rate for a 35-year old female driver in Charleston over the past six years. This is shown in **Table 2** on the following page.

**Table 2. One-Year Rate Change for the Median Company**

<i>Median Company</i>	<i>January Of Year</i>	<i>Annual Rate</i>	<i>Year to Year Change</i>
GEICO General Ins. Company	2003	\$469	--
State Farm Mutual Auto Ins. Co.	2004	\$485	3.40%
State Farm Mutual Auto Ins. Co.	2005	\$531	9.50%
Horace Mann Insurance Co.	2006	\$474	-10.70%
Metropolitan P&C Ins. Co.	2007	\$406	-14.40%
Metropolitan P&C Ins. Co.	2008	\$430	5.90%
Amica Mutual Insurance Co	2009	\$447	3.95%

Note: Thirty-five year-old, married, female driver in Charleston; standard companies only.

Using the median 2003 rate as a baseline, you may note that the auto insurance rates in this survey are still about 4.6% below the level found 5 years ago (*despite the marginal increases over the past two years*), and nearly 16% below the highest median rate which occurred in 2005. While these survey rates are most likely not representative of the actual premiums being paid for auto insurance in West Virginia over these periods, these changes can be noted as being significant as they have occurred despite general increases in the prices of other consumer goods on average (*i.e. the Consumer Price Index*) which commonly inflate continuously. Also worthy of note, is that the 2006-07 decreases occurred in part due to the civil justice reforms enacted by the West Virginia Legislature in 2005.

- B) A more direct method is to sum the responses by year and to then gauge the relative year to year changes. Using annual West Virginia market share data from the *NAIC* database and matching the companies with the highest West Virginia marketshares by year to those who have continuously responded to the survey over the same number of years, the following information was achieved:

<b>Company Name</b>	<b>Market Share</b>				
	<b>2004</b>	<b>2005</b>	<b>2006</b>	<b>2007</b>	<b>2008</b>
<i>Erie Ins Prop &amp; Cas Co</i>	10.31%	9.96%	9.81%	10.02%	10.17%
<i>Liberty Mut Fire Ins Co</i>	1.67%	1.73%	1.79%	1.75%	1.81%
<i>Nationwide Mut Ins Co</i>	15.81%	16.04%	16.37%	16.15%	16.11%
<i>Nationwide Prop &amp; Cas Ins Co</i>	1.91%	1.95%	2.08%	2.13%	2.06%
<i>Progressive Classic Ins Co</i>	2.79%	2.97%	2.96%	2.79%	2.59%
<i>Safeco Ins Co Of Amer</i>	1.34%	1.47%	1.49%	1.42%	1.66%
<i>State Farm Mut Auto Ins Co</i>	27.88%	26.72%	26.26%	26.37%	25.46%
<i>Westfield Ins Co</i>	2.09%	2.29%	2.65%	2.70%	2.84%
<b>8 Company Total Marketshare</b>	<b>63.80%</b>	<b>63.13%</b>	<b>63.41%</b>	<b>63.33%</b>	<b>62.69%</b>

Accordingly, compiling responses from each of the 8 companies above should yield a sample that is roughly representative of rates in our market for about 63% of the West Virginia market for each year. For the purposes of generating a year to year rate comparison, we can extrude two separate samples of rates provided in earlier Auto Survey's for each of the companies above over the 2004-2008 time period.

**Sample A:** Responses provided to the 25 year old single female in Williamson, WV example:

Company Name	Premium				
	2004	2005	2006	2007	2008
<i>Erie Ins Prop &amp; Cas Co</i>	\$611	\$584	\$508	\$536	\$488
<i>Liberty Mut Fire Ins Co</i>	\$470	\$551	\$549	\$593	\$721
<i>Nationwide Mut Ins Co</i>	\$584	\$491	\$413	\$521	\$609
<i>Nationwide Prop &amp; Cas Ins Co</i>	\$742	\$622	\$523	\$633	\$748
<i>Progressive Classic Ins Co</i>	\$936	\$931	\$857	\$1,664	\$1,465
<i>Safeco Ins Co Of Amer</i>	\$389	\$510	\$510	\$600	\$771
<i>State Farm Mut Auto Ins Co</i>	\$632	\$687	\$610	\$565	\$607
<i>Westfield Ins Co</i>	\$421	\$425	\$392	\$411	\$396

**Sample B:** Responses provided to the 35 year old married male in Charleston, WV example:

Company Name	Premium				
	2004	2005	2006	2007	2008
<i>Erie Ins Prop &amp; Cas Co</i>	\$420	\$428	\$376	\$383	\$345
<i>Liberty Mut Fire Ins Co</i>	\$378	\$429	\$447	\$507	\$640
<i>Nationwide Mut Ins Co</i>	\$567	\$442	\$382	\$476	\$441
<i>Nationwide Prop &amp; Cas Ins Co</i>	\$721	\$560	\$484	\$575	\$534
<i>Progressive Classic Ins Co</i>	\$619	\$582	\$557	\$1,044	\$935
<i>Safeco Ins Co Of Amer</i>	\$315	\$406	\$406	\$388	\$657
<i>State Farm Mut Auto Ins Co</i>	\$485	\$531	\$472	\$428	\$443
<i>Westfield Ins Co</i>	\$389	\$384	\$355	\$338	\$311

To make a level year-to-year comparison, weight each of the sample rates above by the annual company market share during the time period that the sampled rates were in effect for each company and then make them relative to the total market share for the entire sample and proceed to sum each of the weighted rates by company for each year.

(For example, in **Sample A**, the **State Farm Mutual** rate provided for 2004 was \$632. The **State Farm Mutual** market share for 2004 was 27.88%. To give the 2004 **State Farm Mutual** response the same weight that it had relative to our total market during 2004 then:  $(\$632 * 27.88\%) / 63.80\%$  With 63.80% being the total 8 company sample market share during 2004 as noted in the initial table from **3b**. The resulting figure, \$176.20 would be added to the resulting figures for each of the 8 other companies for 2004 which are similarly calculated, and would equate to a total marketshare weighted survey response for 2004.)

The tables for **Sample A** and **Sample B** on the following page demonstrates the results of this by-year weighting process.

Table for **Sample A:**

<b>Company Name</b>	<b>Market Share Weighted Premium</b>				
	<b>2004</b>	<b>2005</b>	<b>2006</b>	<b>2007</b>	<b>2008</b>
<i>Erie Ins Prop &amp; Cas Co</i>	\$63	\$58	\$50	\$54	\$50
<i>Liberty Mut Fire Ins Co</i>	\$8	\$10	\$10	\$10	\$13
<i>Nationwide Mut Ins Co</i>	\$92	\$79	\$68	\$84	\$98
<i>Nationwide Prop &amp; Cas Ins Co</i>	\$14	\$12	\$11	\$13	\$15
<i>Progressive Classic Ins Co</i>	\$26	\$28	\$25	\$46	\$38
<i>Safeco Ins Co Of Amer</i>	\$5	\$7	\$8	\$9	\$13
<i>State Farm Mut Auto Ins Co</i>	\$176	\$184	\$160	\$149	\$155
<i>Westfield Ins Co</i>	\$9	\$10	\$10	\$11	\$11

*25 SF Williamson*

<b>Total Annual Weighted Premiums</b>	<b>\$617</b>	<b>\$613</b>	<b>\$539</b>	<b>\$595</b>	<b>\$626</b>
<b>2004 Baseline Change</b>	0.00%	-0.64%	-12.67%	-3.59%	1.50%

Table for **Sample B:**

<b>Company Name</b>	<b>Market Share Weighted Premium</b>				
	<b>2004</b>	<b>2005</b>	<b>2006</b>	<b>2007</b>	<b>2008</b>

<b>2004 Baseline Change</b>	0.00%	-2.78%	-13.47%	-7.14%	-8.61%

From the tables above you can determine that according to those rates which are currently prevalent for about 63% of our marketplace, that auto insurance rates in West Virginia have remained at or below the levels which were in existence in 2004, and that while the survey responses for 2008 are slightly and generally above those provided in 2007, that auto insurance rates in the marketplace for 2008 are still essentially lower in West Virginia than they were four years ago. Hopefully this trend will continue into the future (*see also the Discussion portion of Section III*).

## **Discussion—Minimum Requirements Comparison**

From the detailed information provided above, an analysis of the State minimum requirements samples can be made using the **48-year old married male** group. Considering only companies responding under the “**Standard/Preferred**” category, and also only those who were able to provide sample rates in all surrounding States (*21 companies in total*), the following relationships can be found averaging the premiums by city.

<b>City</b>	<b>Premium</b>
<b>St. Clairsville, OH</b>	\$262
<b>Marietta, OH</b>	\$294
<b>Ironton, OH</b>	\$308
<b>Winchester, VA</b>	\$322
<b>Martinsburg</b>	\$387
<b>Bluefield, VA</b>	\$403
<b>Morgantown</b>	\$417
<b>Hagerstown, MD</b>	\$448
<b>Wheeling</b>	\$453
<b>Parkersburg</b>	\$468
<b>Bluefield</b>	\$485
<b>Huntington</b>	\$486
<b>Pt. Marion, PA</b>	\$524
<b>W. Alexander, PA</b>	\$547
<b>Ashland, KY</b>	\$594
<b>6 State Average</b>	<b>\$426</b>
<b>WV Average</b>	<b>\$449</b>
<b>5 State Avg (-WV)</b>	<b>\$411</b>

As you can see, the West Virginia sample premiums are located in the middle range of the pricing continuum. In this sample, the West Virginia average premium is only 9.3% higher than that being reported for all surrounding States. Intuitively, the relationships between the minimum limits of insurance required by State should also be examined to determine to what degree, if any, those limits may be contributing to differences in premiums. By converting all of the different limits of coverage from a split limit basis to the equivalent Combined Single Limit (CSL) basis (*total amount which could be paid for all injuries and property damage in one accident*) the relative amounts of coverage being afforded can be examined.

	<b>Min per person BI</b>	<b>Min per accident BI</b>	<b>Min PD</b>	<b>CSL Equivalent</b>	<b>Min PIP / MB</b>	<b>Total Min Coverage</b>
<b>Ohio</b>	\$12,500	\$25,000	\$7,500	\$32,500	\$0	\$32,500
<b>Pennsylvania</b>	\$15,000	\$30,000	\$5,000	\$35,000	\$5,000	\$40,000
<b>West Virginia</b>	\$20,000	\$40,000	\$10,000	\$50,000	\$0	\$50,000
<b>Maryland</b>	\$20,000	\$40,000	\$15,000	\$55,000	\$2,500	\$57,500
<b>Kentucky</b>	\$25,000	\$50,000	\$10,000	\$60,000	\$10,000	\$70,000
<b>Virginia</b>	\$25,000	\$50,000	\$20,000	\$70,000	\$0	\$70,000

(CSL equivalent = per accident BI and PD only; Total Min Coverage = CSL Equiv. + First Party Benefits, if any)

As you can discern in the table from the total minimum coverage amounts alone, Ohio should have the lowest premiums (*which it does*), and Virginia or Kentucky should then have the highest premiums (*which is only partially true*). Accordingly, while the limits of insurance being afforded do appear to play some role in the premium relationships demonstrated in the minimum requirements survey response, they clearly do not govern a significant portion of the observed differences in premiums.

## **Discussion—Equivalent Limits Comparison**

As was done for the preceding section, an analysis of the responses provided under the equivalent limits comparison question can be made for the **48-year old married female** group (*responses afforded for both the male and female inquiries were substantially similar*) as a sample. Again, examining only companies responding under the “**Standard/Preferred**” category, and also only those companies which were able to provide sample rates for each of the surrounding States (*21 companies in total*), the following relationships were observed by averaging the premiums provided by city.

<b>City</b>	<b>Premium</b>
<b>St. Clairsville, OH</b>	\$354
<b>Winchester, VA</b>	\$381
<b>Marietta, OH</b>	\$394
<b>Ironton, OH</b>	\$415
<b>Bluefield, VA</b>	\$479
<b>Martinsburg</b>	\$481
<b>Morgantown</b>	\$517
<b>Hagerstown, MD</b>	\$540
<b>Wheeling</b>	\$565
<b>Parkersburg</b>	\$579
<b>Huntington</b>	\$601
<b>Bluefield</b>	\$606
<b>Pt. Marion, PA</b>	\$673
<b>W. Alexander, PA</b>	\$709
<b>Ashland, KY</b>	\$725
<b>6 State Average</b>	<b>\$535</b>
<b>WV Average</b>	<b>\$558</b>
<b>5 State Avg (-WV)</b>	<b>\$519</b>

Similar to the finding in the prior section, the West Virginia premiums are again shown to be in the mid-range of the pricing continuum, however the difference between the WV Average premium and the Average premiums of the 5 surrounding States is even less pronounced in this equivalent limits comparison (*down from +9.3% to only +7.5%.*)

Many factors certainly contribute to differences in auto insurance premiums which exist between States. It is not only a factor of the differing amounts and types of coverages which are mandatory in a given State at a minimum level, but there are also key differences between the basic legal mechanisms through which all auto insurance claims within any given State will pass. In the following table you may note how these differences exist between West Virginia and all of our surrounding States.

<b>State</b>	<b>No Fault States</b>	<b>No Fault First Party Benefits</b>	<b>Traditional Tort</b>	<b>Lawsuit Restrictions</b>
<b>Kentucky</b>	X	Mandatory		Monetary
<b>Maryland</b>	X	Mandatory		No
<b>Ohio</b>			X	No
<b>Pennsylvania</b>	X	Mandatory		Injury
<b>Virginia</b>	X	Optional		No
<b>West Virginia</b>			X	No

Most notable from the preceding table is that the legal systems of Ohio and West Virginia, as both are traditional tort States, are most similar with respect to insurance liability claims as opposed to the other surrounding States. In our other surrounding States, an insured's own policy will provide some or all of the indemnity for bodily injury or property damage without regard to fault. While the no-fault States of Maryland and Virginia do not have any statutory threshold above which a suit can be brought, both Kentucky and Pennsylvania have established those types of limits in an attempt to further reduce auto liability lawsuits and ultimately auto insurance costs overall. Being that such key structure differences exist between West Virginia and our surrounding States, even a strict limit to limit comparison of auto insurance premiums by State lacks a certain degree of relevance.

However, if a comparison of only Ohio and West Virginia sampled premiums are made at the same amounts and types of coverage being afforded (*Bodily Injury & Property Damage Liability, and Uninsured Motorists Coverage each at \$100/\$300/\$50*) where the State to State systems governing claim settlement are substantially similar, the following average premiums by city are found using the same sample which was analyzed on the prior page:

<b>City</b>	<b>Premium</b>
<b>St. Clairsville, OH</b>	\$354
<b>Marietta, OH</b>	\$394
<b>Ironton, OH</b>	\$415
<b>Martinsburg</b>	\$481
<b>Morgantown</b>	\$517
<b>Wheeling</b>	\$565
<b>Parkersburg</b>	\$579
<b>Huntington</b>	\$601
<b>Bluefield</b>	\$606
<b>2 State Average</b>	<b>\$501</b>
<b>WV Average</b>	<b>\$558</b>
<b>OH Average</b>	<b>\$388</b>

Clearly, a significant difference can be noted to truly exist between the West Virginia and Ohio premiums as the surveyed State Average premiums differ by 43.9%. As the twenty-one companies which were surveyed in order to obtain these premiums are the same exact writing companies in each State, the systems of expense provisions which underlie their premiums could be assumed to be substantially similar by company and by State (*excepting the known difference in state insurance premium taxes of 4.55% in West Virginia, and only 1.40% in Ohio.*) It is therefore reasonable to assume that some corresponding difference in loss experience should be apparent between West Virginia and Ohio.

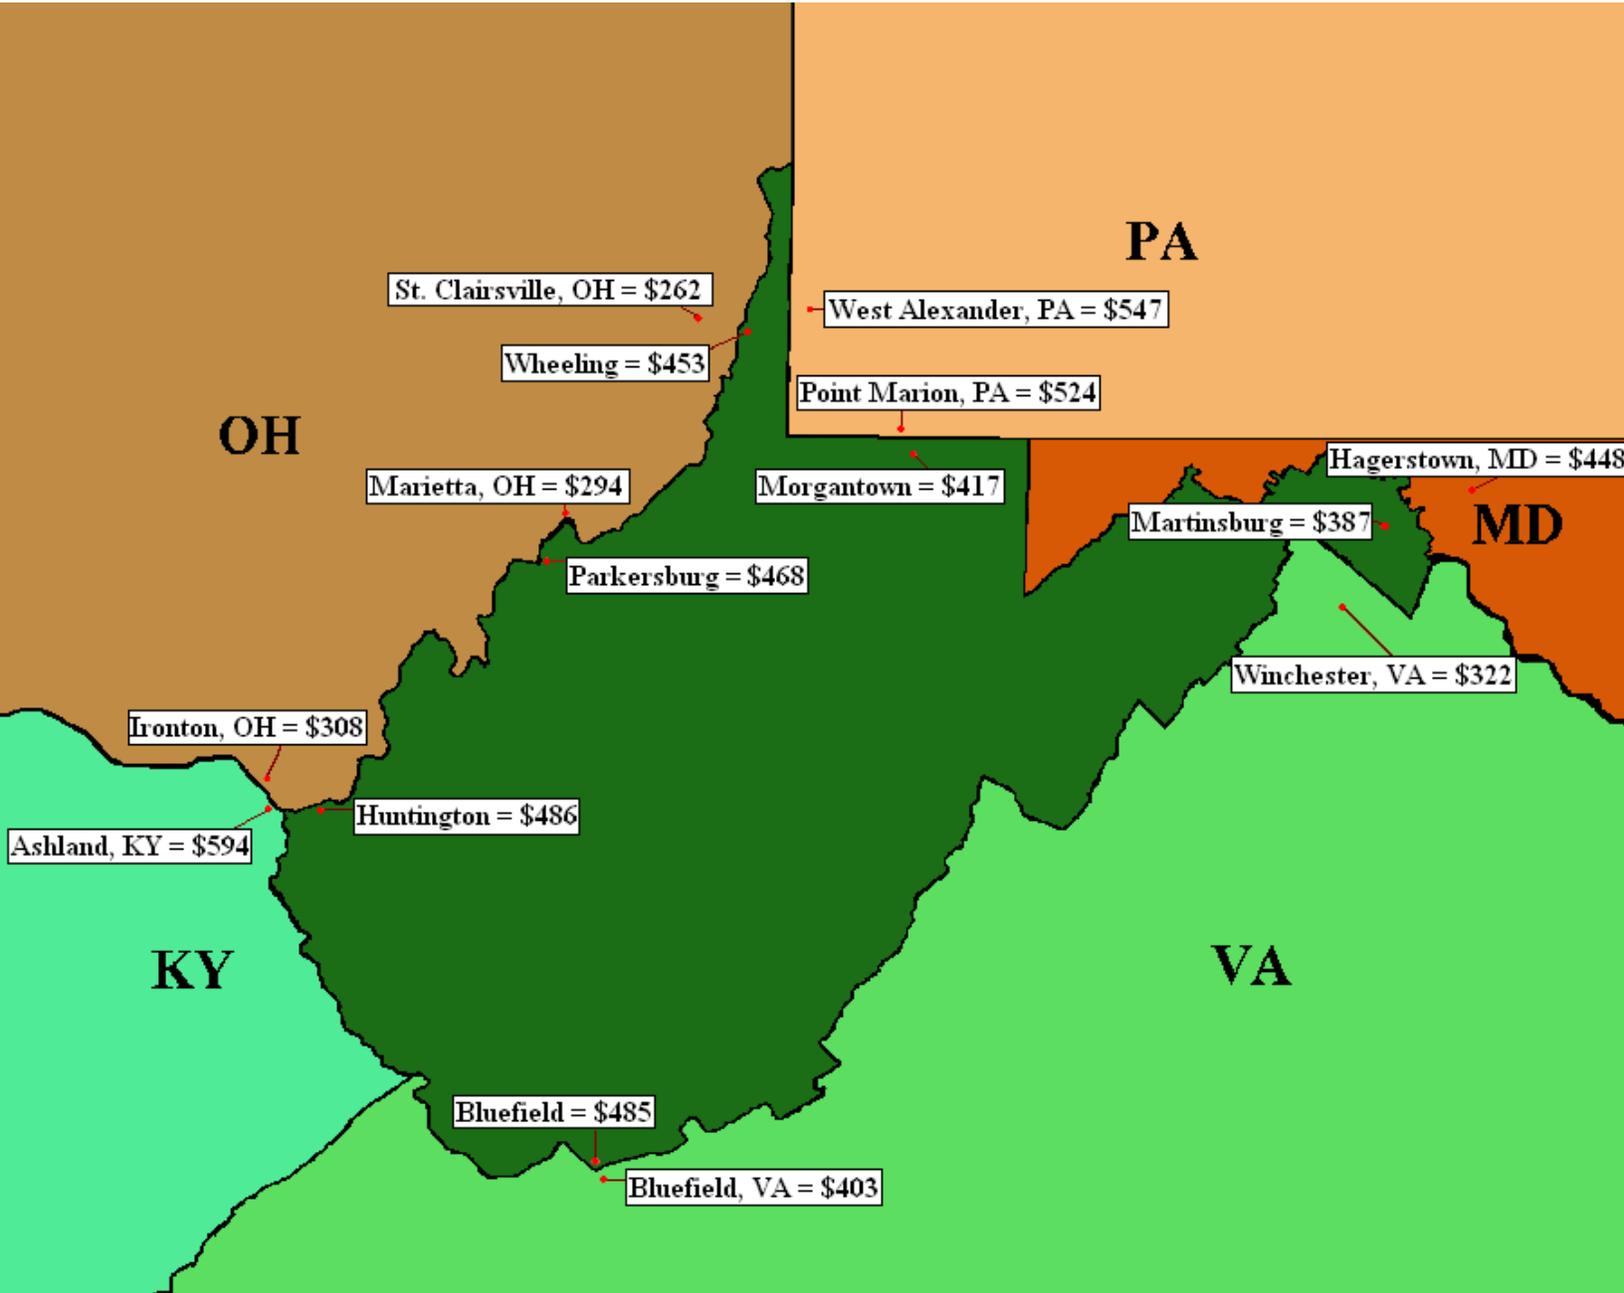

Using the three most recent years of available data with the number of autos which are insured in the voluntary market by State (2004 through 2006) from the *Insurance Information Institute*, and aggregated by-State incurred loss data as obtained from the *National Association of Insurance Commissioners (NAIC)* database, we can attempt to gauge whether or not any differences do in fact exist between Ohio and West Virginia on a loss cost basis (*i.e. the amount of premiums that must be collected per exposure to pay for the losses of all exposures*) as indicated above. It follows then:

	<i>NAIC data</i>	<i>III data</i>	
	<b>2004 Total Losses</b>	<b>2004 Autos</b>	<b>2004 Loss Cost</b>
<b>OH</b>	\$1,812,680,783	7,933,866	<b>\$228.47</b>
<b>WV</b>	\$428,839,373	1,258,179	<b>\$340.84</b>
	<b>2005 Total Losses</b>	<b>2005 Autos</b>	<b>2005 Loss Cost</b>
<b>OH</b>	\$1,697,750,297	7,936,071	<b>\$213.93</b>
<b>WV</b>	\$448,993,597	1,236,758	<b>\$363.04</b>
	<b>2006 Total Losses</b>	<b>2006 Autos</b>	<b>2006 Loss Cost</b>
<b>OH</b>	\$1,584,891,405	7,939,167	<b>\$199.63</b>
<b>WV</b>	\$398,324,504	1,261,544	<b>\$315.74</b>
	<b>3 year Losses</b>	<b>3 year Autos</b>	<b>3 year Loss Cost</b>
<b>OH</b>	\$5,095,322,485	\$23,809,104	<b>\$214.01</b>
<b>WV</b>	\$1,276,157,474	\$3,756,481	<b>\$339.72</b>

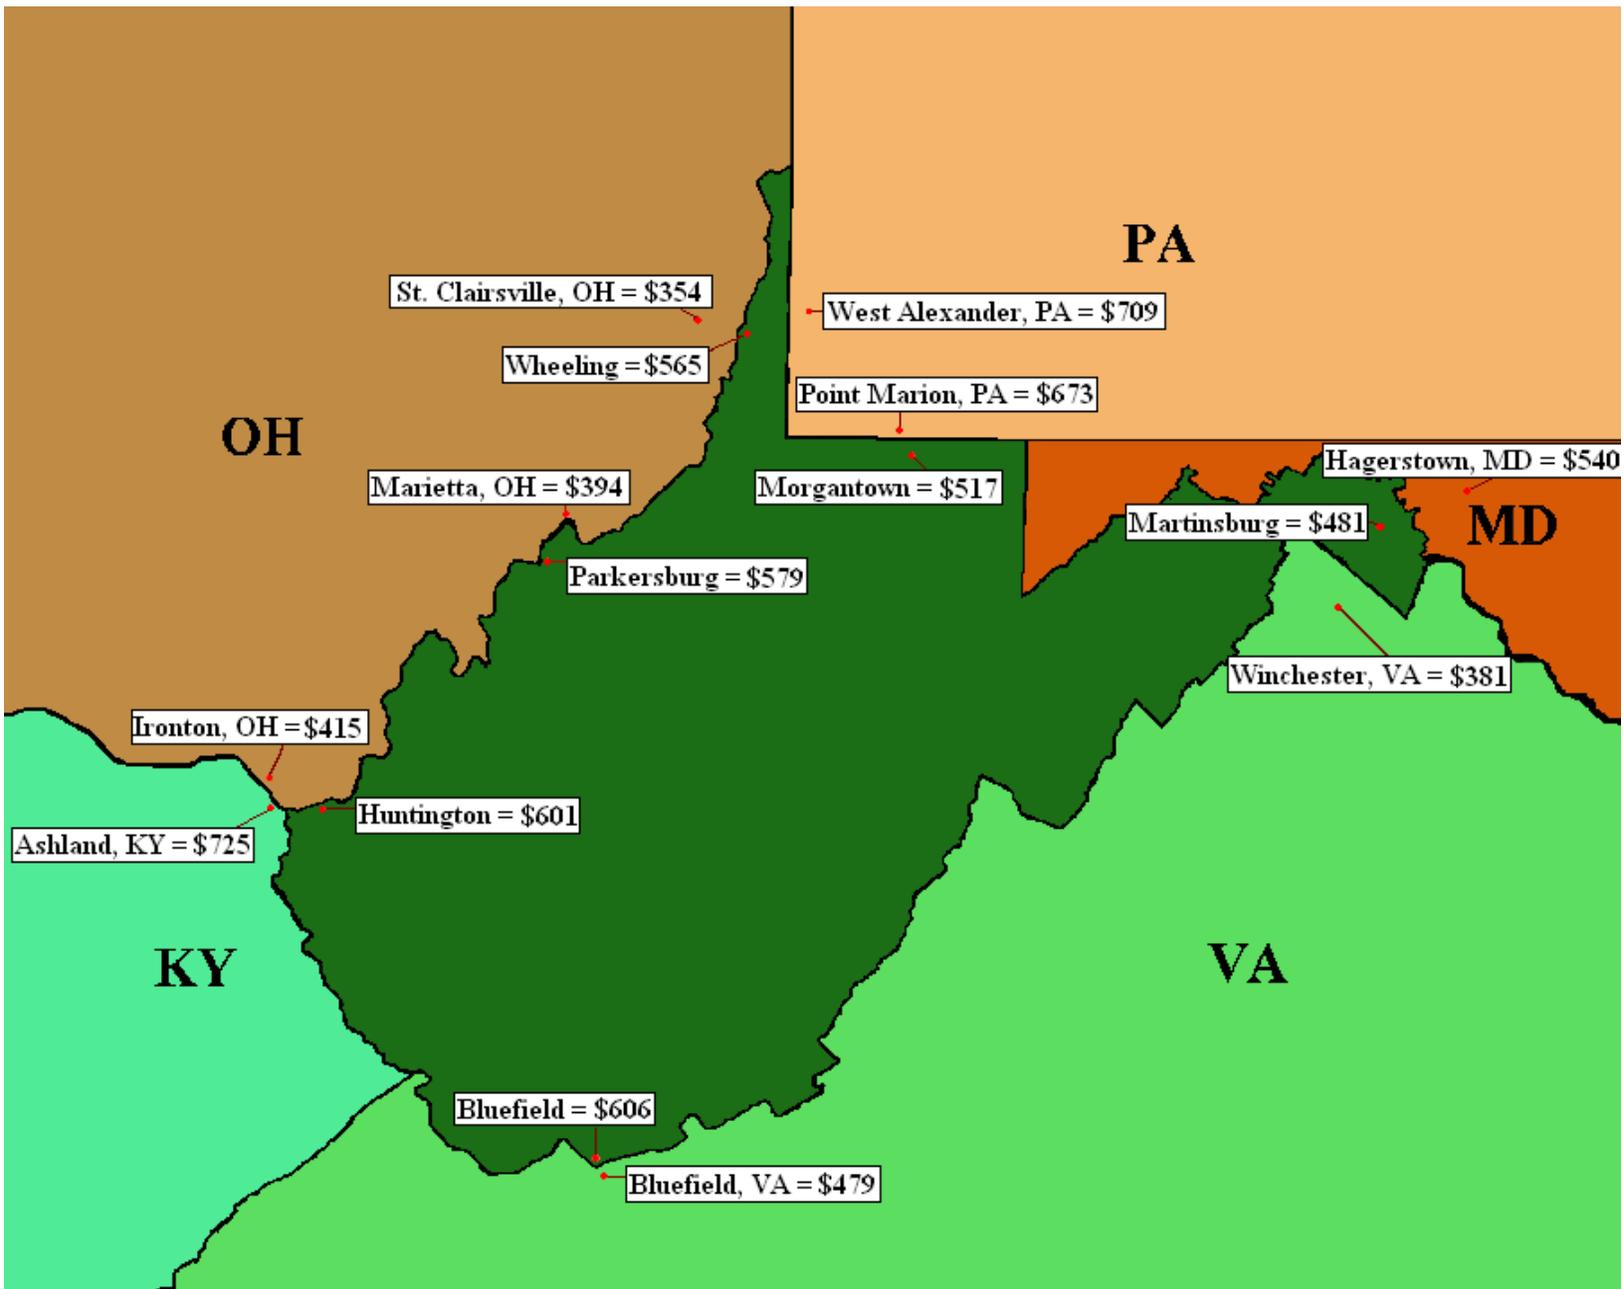

*(Losses are for Liability lines only, i.e. no Physical Damage Coverages)*

Looking at only three years of aggregate by-State data from the table above, the observed difference in the average surveyed premiums between Ohio and West Virginia (43.9% from the preceding page) is found to reflect that which in fact should exist according to the relative loss experience of each State (*i.e. \$339.72 / \$214.01 = 58.7%*). While again, a number of other factors will likely underlie any observed differences in actual losses by State as well, a difference in relative loss experience between the two States largely does merit the noted difference in the reported premiums.

*Graphical representation of the 21 company average minimum limits (cost to cost) comparison for the surveyed 48 year old married male.*

*Graphical representation of the 21 company average equivalent limits comparison for the surveyed 48 year old married female.*

## Discussion

From any of the preceding tables, and as was noted in the **Discussion** portion of **Section I**, you may observe that a very small number of companies write a significant portion of the personal auto insurance market in West Virginia. In examining historical West Virginia data obtained from the *NAIC* you can observe that while this remains true today, it is less prevalent in 2008 than it was in the recent past.

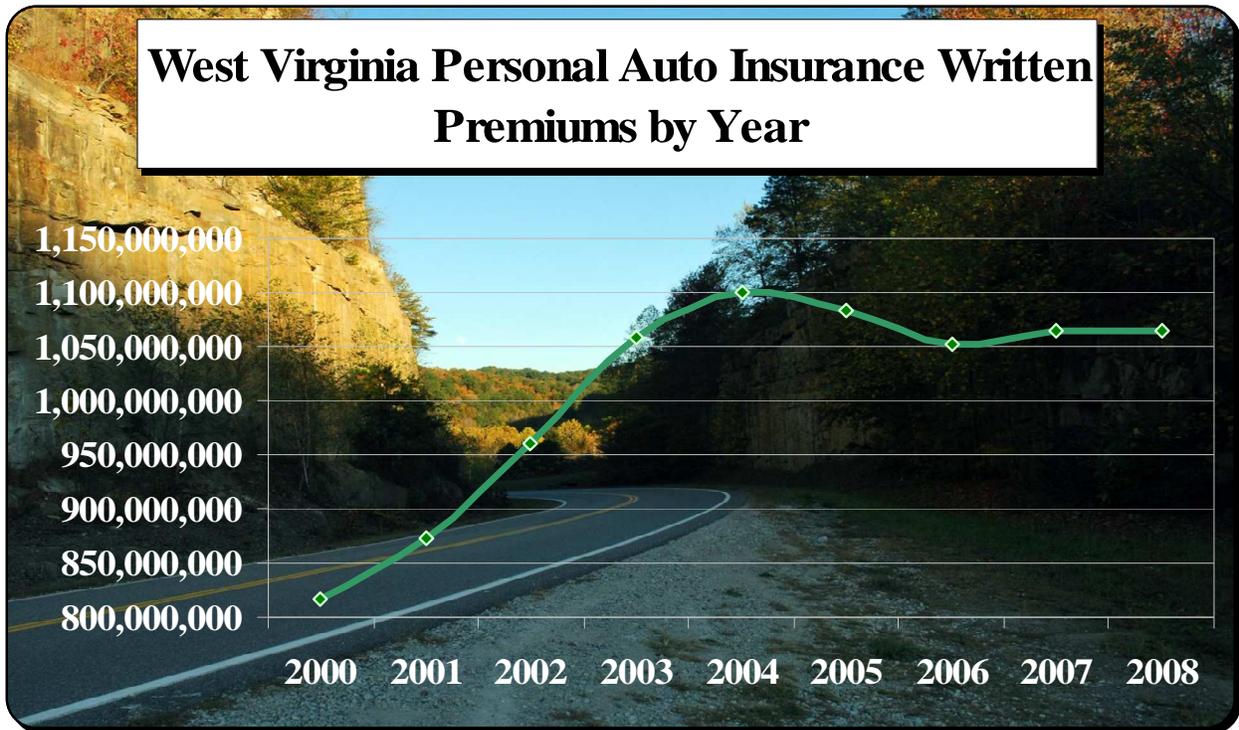

<b>Number of Firms totaling 80% of WV Market Share</b>	
2000	13
2001	13
2002	13
2003	14
2004	15
2005	16
2006	16
2007	16
2008	17

A more thorough analysis of historical West Virginia personal auto premium volumes reveals shifts within the middle to upper ranges of our market over more recent years:

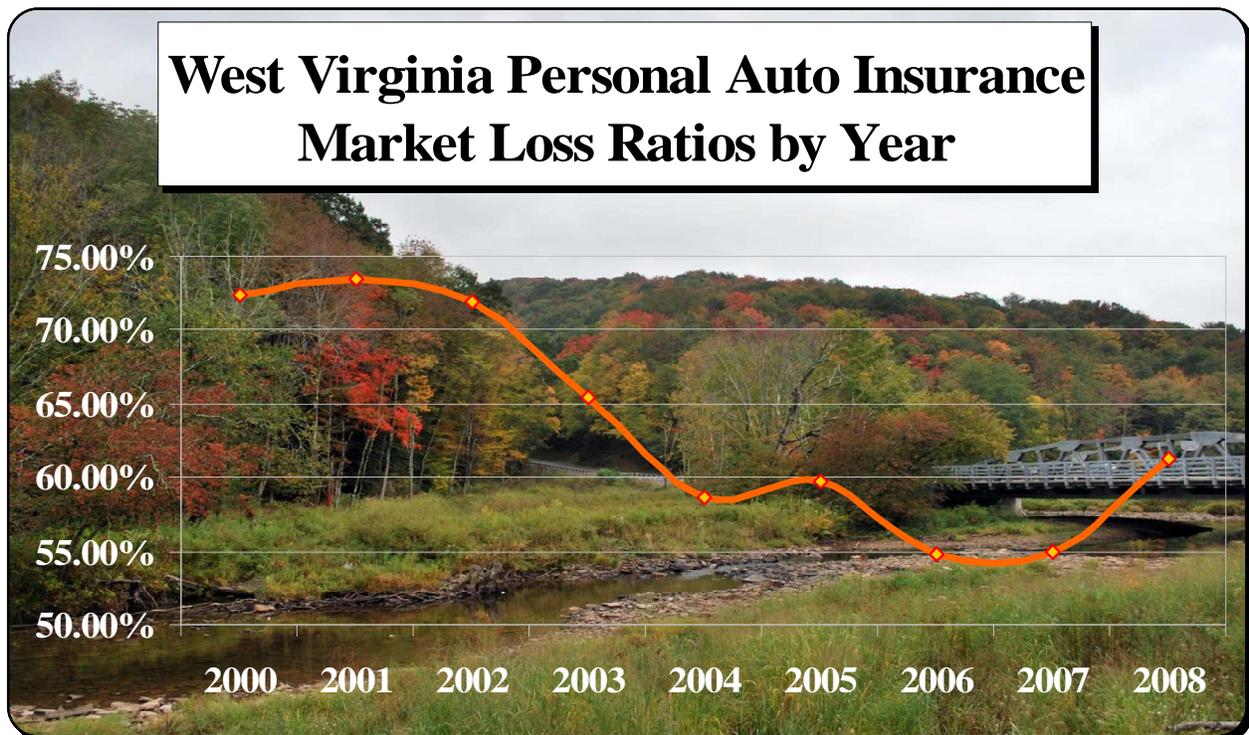

<b>Number of Companies having written premium volumes of:</b>											
	<b>25K</b>	<b>\$50K</b>	<b>\$100K</b>	<b>\$250K</b>	<b>\$500K</b>	<b>\$1M</b>	<b>\$2M</b>	<b>\$5M</b>	<b>\$10M</b>	<b>\$50M</b>	<b>\$100M</b>
2000	103	93	83	70	58	49	40	22	13	4	2
2001	95	92	86	72	60	51	38	27	15	4	2
2002	90	85	79	67	59	51	40	28	15	4	2
2003	91	87	80	71	59	55	42	32	17	4	3
2004	91	87	80	71	59	55	42	32	17	4	3
2005	85	81	79	69	62	56	44	34	22	4	3
2006	88	84	81	68	62	53	43	32	21	4	3
2007	87	82	79	67	58	51	43	33	21	3	3
2008	89	86	82	70	62	55	46	33	21	3	3

While this table may be somewhat indicative of some smaller firms having exiting our marketplace, as well as partially representative of the overall premium volume increases observed as having occurred over this same time period, the significant market shifts occurring between 2000 to 2007 in the \$5 million and \$10 million premium ranges appear to be reflective of increased competition in our market.

The aggregate changes in auto insurance premiums written in West Virginia occurring over the time period referenced above demonstrated graphically:

While the increase in auto insurance premiums from 2000 to 2004 was somewhat dramatic, premium volume has shown to have leveled out since that time. Further, as our premium volume has currently stabilized, loss experience has likewise further improved and should generally impact future auto insurance premiums in West Virginia favorably as future rates are based upon past loss experience.

## Summary

This guidebook provides a comparison of basic auto insurance rates for West Virginians. It has emphasized that a significant variation in auto rates can be observed from company to company even for substantially similar risks. While the inter-State portion of the survey does indicate that the average auto insurance premiums in West Virginia are currently somewhat higher than those of our surrounding States, many equitable factors are contributing to the reasonability of the current auto insurance rates being used in West Virginia, not the least of which is our relative historical loss experience. Other considerations will also function as factors in establishing State specific auto insurance rates such as having a tort system as opposed to a no-fault system, differences in exposures such as the number of rural road miles versus urban road miles driven, the costs for auto repair completed in our State, the number of insurance companies competing within the marketplace, etc.

It is helpful to be reminded how we can keep auto insurance rates from increasing faster: drive carefully. This includes wearing seatbelts, obeying the rules of the road and always properly maintaining your vehicles. Although accidents and auto damage can never be completely eliminated, prudent steps will help to mitigate future increases in auto insurance rates.

## **Appendix:**

2009 Auto Survey completion instructions (i.e. common assumptions):

# **MEMORANDUM**

**To: All Companies Licensed to Sell Automobile Insurance in West Virginia**

**From: Jane L. Cline  
West Virginia Insurance Commissioner**

**Date: March 01, 2009**

The purpose of this survey is to compare rates between auto writers for the basic mandatory coverage limits as set forth in §17D-4-2. As the Code does not mandate comprehensive, collision, medical payments, or underinsured motorist coverage, please do not include these coverages when rating the examples. Once compiled, the survey will be mailed to all public libraries and county sheriffs' offices in our State in addition to being made available on our website.

## **INSTRUCTIONS**

- 1) Each company must complete and return all 3 pages of the survey.
- 2) We realize that not all criteria used in our examples will correspond to your rating plans. You will have to use some judgment to determine the appropriate rate. Our objective is to obtain base premium comparisons for similar coverage from all companies which vary only by the age and marital status of the operator and by garaging location.
- 3) For companies with multiple tiers or programs in their personal automobile portfolios, please use the rates in the tier or program currently having the most business in our state if the example permits.
- 4) Please round the premiums to the nearest whole dollar.
- 5) No surcharges or discounts should be assumed unless such is a prerequisite to providing any rate. If these are necessary, the response should contain information indicating the types and amounts of each.
- 6) If the year make and model of the vehicle is instrumental in determining your liability rates, please utilize a 2003 Toyota Camry 4 door VIN: JT1BE32K&3.
- 7) Other key assumptions: Operator has no incidents, accidents or violations in the experience period. The sample operator is the only operator or the principle operator. The sample vehicle is the only vehicle. The operator's insurance score would result in the operator being classified similarly to the majority of insureds in your program in West Virginia, i.e. an average score relative to your entire book of business.

- 8) Note that each sample city now includes specific zip codes for rating. If the zip code shown for a city is not contemplated by your rating plan, please use another zip code for that same city.
- 9) As we did for 2008, a third page has been added to the survey response form in order to compare WV rates to those nearest in neighboring states. The same general principles as above apply. If your company is not licensed in one of those sample states, please indicate, "N/A." for that state's rate in your response.
- 10) Note that other than the gender variations, the differences between **Example 6** and **Example 7** on page **3** are the limits of insurance.
- 11) For **Example 6** we are attempting to compare actual costs. Accordingly for **Example 6**, please provide rates for the minimum amounts and types of coverage required by the applicable law of the state of the example city. *(Note that this was completed for earlier examples in the WV cities and those responses are pre-filled. Note also that the minimum amounts and types of coverage by state are listed beside of each state.)*
- 12) For **Example 7** we are attempting to compare pricing of the same coverages and limits which vary only by garaging state. Accordingly for **Example 7**, please provide all rates on a \$100/\$300/\$50 basis for Bodily Injury and Property Damage Liability as well as Uninsured Motorists Bodily Injury and Property Damage. If those specific limits are not available in your program, please use the available limits which most closely approximate those limits. If other limits are needed to be used, please indicate what those limits are.
- 13) In **Example 7**, please provide the Personal Injury Protection coverage premium separate from the Liability and UM premiums. Provide the PIP premium only where required by law and in the minimum amounts required.
