

Commissioner Dodrill Appointed to CIPR Advisory Council

Since 2011, the NAIC's Center for Insurance Policy and Research (CIPR) has provided research and education to drive discussion and advance thoughtful leadership, as well as action, on current and emerging insurance issues amongst insurance regulators, policymakers, industry and academia. This is accomplished through produced research reports, papers, surveys and briefs; educational events and workshops at NAIC national meetings, the NAIC insurance summit, and other periodically organized sessions; the CIPR's research library collection and knowledge distribution sources; and research published in the NAIC's Journal of Insurance Regulation (JIR).

Representing the NAIC's Southeast Zone on the new CIPR Advisory Council (CIPRAC), Commissioner Dodrill will support CIPR's efforts through feedback, guidance, and direction, and will be an advocate and liaison for the research work to relevant regulatory stakeholders.
